

DevOps Engineer (3–5 Years Experience)

Job Description

Position Overview

Seeking a skilled DevOps Engineer with 3–5 years of experience to design, implement, automate, and maintain secure, scalable, and highly available infrastructure. The ideal candidate will have strong expertise in CI/CD, cloud platforms, containerization, Infrastructure as Code (IaC), monitoring, and Linux administration.

Key Responsibilities

- Design, build, and maintain CI/CD pipelines.
- Automate infrastructure provisioning using Infrastructure as Code.
- Deploy and manage containerized applications using Docker and Kubernetes.
- Manage cloud infrastructure (AWS/Azure/GCP).
- Monitor system performance and availability using observability tools.
- Troubleshoot infrastructure, deployment, networking, and production issues.
- Collaborate with development, QA, and security teams.
- Implement DevSecOps best practices and security controls.
- Optimize system reliability, scalability, and cost.
- Maintain documentation and operational runbooks.

Required Skills

- 3–5 years of DevOps/SRE experience.
- Strong Linux administration and shell scripting (Bash/Python).
- Hands-on experience with Git, GitHub/GitLab/Bitbucket.
- CI/CD: Jenkins, GitHub Actions, GitLab CI, or Azure DevOps.
- Docker and Kubernetes (EKS/AKS/GKE/OpenShift is a plus).
- Cloud: AWS preferred (EC2, VPC, IAM, S3, RDS, EKS, CloudWatch); Azure/GCP acceptable.
- IaC: Terraform and/or Ansible.
- Monitoring: Prometheus, Grafana, ELK/OpenSearch, Loki, Datadog, or New Relic.
- Databases: PostgreSQL, MySQL, MongoDB basics.
- Networking fundamentals: DNS, HTTP/HTTPS, Load Balancers, SSL/TLS.

Preferred Qualifications

- Bachelor's degree in Computer Science, Information Technology, or related field.
- Certifications such as AWS Certified DevOps Engineer, AWS Solutions Architect, CKA, CKAD, or Terraform Associate are preferred.
- Experience with security scanning tools, secrets management, and incident response.

Soft Skills

- Strong problem-solving and analytical skills.
- Excellent communication and collaboration.
- Ability to work in Agile/Scrum teams.
- Ownership mindset and continuous learning attitude.

Nice to Have

- Helm, Argo CD, FluxCD.
- Serverless deployments.
- Redis, Kafka, RabbitMQ.
- Experience supporting high-availability production systems.

Benefits

- Competitive salary and performance bonuses.
- Health insurance and paid leave.
- Learning and certification support.
- Flexible work environment and career growth opportunities.
